

<u>CAUTION</u>: When beds are not being manually raised or lowered, the BRAKE MUST BE SET

or beds will drift down and will damage objects or vehicles placed below the beds.

To Manually Raise the beds:

- 1. Unplug the motor
- 2. Release the brake
- 3. Turn hex shaft using a ¹/₂" ratchet wrench.
- 4. Re-apply brake at desired bed height.
- 5. Reconnect motor plug.

To Manually Lower the beds:

- 1. Unplug the motor
- 2. Release the brake
- 3. Apply downward pressure to the bed platform. Bed will slowly drift downward.
- 4. Re-apply brake at desired bed height.
- 5. Reconnect motor plug.
